

Allowed Locations

Concept: Adopt a zoning overlay that limits VRDs to commercial and residential areas in close proximity to tourist amenities (See three map alternatives).

Other options:

- Proceed with one of the map alternatives.
- Adopt an alternative zoning overlay boundary.
- Prohibit VRDs in low density residential areas irrespective of proximity to tourist amenities (e.g. R-1 and R-2).
- Prohibit VRDs in all residential zones.
- No limitations on where VRDs can locate and address impacts with a license cap and/or proximity limitations.
- No limitations on where VRDs can locate and address impacts through enforcement of existing standards.
